

Essential Technology Guide

For Petroleum Jobbers, Distributors & Retailers

Sponsored by:  SMARTLOGIX™

“DON’T SAY THAT WORD!”

TECHNOLOGY ... TECHNOLOGY...that’s right I said it. Technology. Its a word that is not easily embraced in the petroleum industry. In an era where consolidation of distributors is rampant and fathers are releasing (or at least loosening) the reigns of their company to the next generation; technology is no longer a perk but it is a requirement to doing business; to staying in business.

People want more information with less effort.

GPS, Geo-fencing, **Electronic** Driver Logs, **Digital** BOL Scanners, In-Compartment Probes, Truck Diagnostics, Optimized Routing, **Automated** Forecasting, Barcode Scanners, In-Cab Cameras...there are so many buzz words and so many options provided separately by different companies.

The key is **Integration**. If you defend your business with technology, how do these technologies interact with each other? Will the vendors cooperate with each other? Are their technologies written in compatible formats; compatible languages?

Is there an integrated solution?

SMARTLogix Inc. offers a complete line of Fuel Management Solutions on a component basis or in a complete integrated package focused and on your competitive sustainability.

Products offered:

SMARTruck – Real Time Wireless Onboard Truck Technology with integrated GPS

SMARTDispatch – Automated Dispatch and Delivery Software with Optimized Routing

SMARTank – Wireless Tank Monitoring Solutions

Consolidation does not have to be a bad thing. **Consolidate** your billing, paperwork, and **processes** in order to **expand** into **new markets** and new businesses. Where is the next profitable market you’d like to be in? Don’t worry about how far you can travel because the truck has to come back...Don’t come back! **Remotely manage** your customers with tank monitors or forecasting tools and manage your **trucks and drivers** with **On-board truck technology**.

Technology – the application of tools and methods: the study, development, and application of devices, machines, and techniques for productive processes and enhanced customer service.

Are You Being Robbed ?

Accurately track every gallon
for every transaction – In real-time

SMARTRUCK Real-Time Theft Deterrent:
