

Integrate Dispatch and Delivery with Back Office Billing

Eliminate paper processes by digitally dispatching to remote drivers. Automatically reconcile your inventory and process billing the same day. Be confident taking on more customers with the same resources, while delivering more gallons with less stops. Empower your team and streamline your operations with SMARTruck™.

"SkyBitz's comprehensive SMARTruck™ automation system provided us with forecasting via remote monitors and degree day, paperless dispatching and integration with DM2. We saw our margins and gallons increase. Everything began to run more efficiently and effectively for us, giving us time to look for more opportunities to further increase those gallons."

Armistead Mauck,
Vice President/Co-Owner

SMARTruck™ Customer Since 2010
